College- and Career-Ready Shifts in English Language Arts/Literacy

 **Complexity:** Practice regularly with complex text and its academic language.

Rather than focusing solely on the skills of reading and writing, the Common Core and other college- and career-ready (CCR) standards highlight the growing complexity of the texts students must read to be ready for the demands of college and careers. CCR standards build a staircase of text complexity so that all students are ready for the demands of college- and career-level reading no later than the end of high school. Closely related to text complexity—and inextricably connected to reading comprehension—is a focus on academic vocabulary: words that appear in a variety of content areas (such as *ignite* and *commit*).

 **Evidence:** Ground reading, writing, and speaking in evidence from text, both literary and informational.

College- and career-ready standards place a premium on students writing to sources, i.e., using evidence from texts to present careful analyses, well-defended claims, and clear information. Rather than asking students questions they can answer solely from their prior knowledge or experience, CCR standards expect students to answer questions that depend on their having read the text or texts with care. CCR standards also require the cultivation of narrative writing throughout the grades; in later grades, a command of sequence and detail will be essential for effective argumentative and informational writing.

Likewise, the reading standards focus on students' ability to read carefully and grasp information, arguments, ideas, and details based on text evidence. Students should be able to answer a range of text-dependent questions, questions in which the answers require inferences based on careful attention to the text.

 **Knowledge:** Build knowledge through content-rich nonfiction.

Building knowledge through content rich nonfiction plays an essential role in literacy and in CCR standards. In K–5, fulfilling the standards requires a 50–50 balance between informational and literary reading. Informational reading primarily includes content rich nonfiction in history/social studies, science, and the arts; the K–5 standards strongly recommend that students build coherent general knowledge both within each year and across years. In grades 6–12, ELA classes pay much greater attention to a specific category of informational text—literary nonfiction—than has been traditional. In grades 6–12, the standards for literacy in history/social studies, science, and technical subjects ensure that students can independently build knowledge in these disciplines through reading and writing.

To be clear, CCR standards—including the Common Core—require substantial attention to literature throughout K–12, as half of the required work in K–5 and the core of the work of 6–12 ELA.
