

ACHIEVE THE CORE

Directions for Producing the Coherence Cards Activity

- Bring files of 7 “themes” plus the K-8 sheet on a flash drive to FedEx or other print center
- Copies: Print as many sets of each file according to how many groups will be performing the task (each file will produce 6 sets of cards)
- Color: Print each file in a different color in order to distinguish one “theme” from another. There should be seven colors in all.
- Size: The cards should be cut by Fed Ex (they are approximately 2 ½” by 5”)
- Special Instructions: The cards should be laminated with a slight border/edge on them

Please note that the activity could be reproduced using other less costly methods as well. For example, you could use a large poster to replicate the K-8 sheet and print out each file and tape the Standards to index cards.
